The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Seward (6,205,818) in view of Wolf et al (5,472,7480).

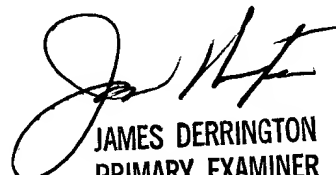

Seward discloses the method of conditioning fused silica optics comprising irradiating the silica optic with a laser beam having a wavelength falling within the range recited in the claims (See Col. 4, lines 5-8 and Col. 6, line 61 ff). The instant claims additionally require that irradiation of silica is preformed in "ramp-like" fashion and "with successive irradiating steps applied in increasingly higher fluences". Wolf et al disclose a related process of conditioning silica materials with a laser beam having a wavelength falling within the claimed range where the process is performed in "ramp-like" fashion. This "ramp-like" process provides an improved silica product as compared with products produced by single fluence laser conditioning methods (See Col. 5, lines 10-15). Multiple pulses of increasing fluence are shown at Col. 3, line 2. It would have been obvious for one of ordinary skill in the art to perform the irradiation treatment of Seward in "ramp-like" fashion and increasing fluence in view of the teachings Wolf et al. With regard to claim 11, Seward clearly contemplate use of the conditioned fused silica optics with a laser. (Col. 4, line 7 ff). In view of the teachings of these combined references additional limitations not explicitly shown would be well within the purview of one of ordinary skill in the art.
